The Aquatic Risk Management course provides information that complements and enhances aquatic manager certification courses. This course offers practical tools beyond certification requirements to address and manage real risks and serious challenges faced on a daily basis at facilities. Topics or issues that interest you can be addressed & discussed throughout. The course is intended to provide practical ideas & solutions that can be brought back to your facilities.

Training is based on ASRG's unique, cutting-edge research and more than 40 years of experience in aquatics, taught by two professionals who have dedicated their careers to water safety and aquatic risk management. Real life examples of court cases and drownings will be discussed. Participants will leave the course with practical ideas for helping keep guests safe, while reducing liability at aquatic facilities.

Participants receive a certificate of completion.
